Welcome to **System Innovations**. Our goal is to transform your home into a fun and exciting place to live, work and play.

**System Innovations** will provide you the dream of a lifetime by designing and installing the most enjoyable and easy-to-use whole-house electronic solution that your whole family will enjoy. Whether you are building a new home or simply remodeling an existing one, we will design and install a completely customized system that reflects your family's needs. From initial design to finished construction, you can count on us to work closely with your builder, architect and interior designer to create your perfect home.

## Watch Movies, Play Video Games or Display Photos in Any Room

Experience entertainment from all your video sources everywhere in your house. Movies from your HD Blu-Ray can be distributed to multiple rooms and simultaneously viewed. Easily control all your video components by using a remote control or touch panel. Our video designs feature surround sound and high-definition video.

## Listen To Pleasant Music Everywhere

Music adds to your enjoyment you can experience at home. Now you can listen to your favorite music from your iPod or any other music device in any room you desire. If you wish to maintain the décor, we will discreetly hide the speakers in the walls or ceiling. We will design your system so that each family member can simultaneously listen to their music collection in any room. Take it a step further and expand your music system throughout your yard.

## Be Efficient With A Computer Network

Imagine the convenience of a home networking system that enables you to easily transfer files from one location to another. Use your flat panel on the wall to operate your computer from the comfort of your favorite living room chair. Your entire home can be networked for a secure and reliable system.

## Enjoy Your Private Home Theater or Media Center

Feel the excitement of a blockbuster movie in your private home theater. With the push of a single button, the curtains will open and your movie will begin to play. Our theaters are designed with enhanced acoustics, comfortable seating, lighting and visual projection. Provide the perfect environment for your family and friends.

## Enjoy Beautiful Lighting Ambiance

Lighting enhances the ambiance of your home. It creates the perfect setting for all family activities, day and night. Adjust the lights for a romantic dinner when it is just the two of you, or set the lights to slowly dim when it's time for your kids to go to bed.

## Control Your Entire Home With Ease

Our integrated systems are designed so that you can operate almost every electronic device in your home. Through simple-to-use touch screens, hand-held remote controls or your iPad, our systems will allow you to control your home, no matter if you're home or away.

## Keep Your Family Safe and Secure

Protect your family and guests with 24/7 monitoring. To keep watch on your kids, our discreetly hidden cameras will blend into your home's décor. Check on the kids or see who's at the door by simply viewing your television, computer monitor, iPad, or other PDA.
